SUGGESTIONS FOR USE OF INDEX

Articles in this index are arranged alphabetically according to subjects. This is not an index of titles. Each article is indexed under the general subject which the article treats. For example, if the article deals with generator testing it will be indexed under tests, if it treats industrial wiring it will be indexed under *wiring*, etc.

Feature length article and major news items have been cross-referenced to facilitate location of articles without extended search.

The following material has not been indexed.

Personal items.
New equipment.
Book Reviews.
Rate Changes.
Minor Financial News.
Minor Manufacturing Market News.

Related articles have been grouped under such headings as:

Appliances—All articles dealing with ranges, water heaters, ironers, etc., are indexed under appliances, rather than under the type of appliance discussed.

Associations, Societies and Goverments Agencies—Major News items and articles relating to this group are indexed under the individual organization name.

Court Decisions and Suits—Major items are indexed under the name of the company involved.

Public Utilities—Articles dealing with individual power companies, and with their related activities, are indexed alphabetically under the company name and *not*, as formerly under the heading Public Utilities.

Rural Electrification—All articles dealing with various phases of supplying service to rural areas are indexed under this subject head.

Statistics—All articles dealing with any type of statistics are indexed under Statistics, regardless of the general subject class that the article falls under.

Steam Stations and Developments, Hydro Plants and Developments — Articles about generating stations are listed under one or the other of these heads, according to the type of station.

Following the main index is an index of authors of signed articles. In this index the exact title is listed.
